

SousChef 1.2.4 (v723) release notes
Released 12/18/2009

Features:

- SousChef's in-application store now supports coupon codes.
- The JRFeedback project was integrated so that Users can now send feedback directly via the Help menu.

Bugs:

- Recipe editing is all around more stable.
- Fixed the bug where pressing Return would remove directions.
- Fixed the bug where long ingredients would cause a RecipeIngredient deletion error or Multiple Validation error and then not allow you to add more recipes.
- Fixed bug with selection when moving from a longer recipe to a shorter one.
- Fixed bug where the selection box would get stuck below the recipe.
- Importing now works for text copied from Google Chrome.
- Improvements made to PDF import.
